VALERIA KEBETS

Data Scientist | AI Research Scientist | Computational Neuroscienst

@ valkebets@gmail.com valkebets.github.io linkedin.com/in/valkebets

ABOUT

Computational research scientist with over 10 years of academic experience. Experienced in management of large datasets, statistical modeling including machine learning, coding, and conveying complex results to a range of audiences and stakeholders. Seeking to apply my expertise toward devising innovative AI-driven solutions to tackle various challenges.

EXPERIENCE

Postdoctoral Research Fellow

McGill University

2021 – Present Montreal, Canada

- Led several research programs that required management of large datasets (N>10,000), processing of neuroimaging data, statistical data analysis, data visualization, generating research reports, and dissemination to scientific and lay audiences
- Wrote reproducible Python, R, and MATLAB code on McGill University's high-computing systems
- Collaborated with engineers, clinicians and neuroscientists
- Mentored 3 undergraduate and graduate students

Postdoctoral Research Fellow

National University of Singapore

2017 – 2020 Singapore

- Led research projects to identify shared biological markers across psychiatric disorders using machine learning
- Co-developed an open source toolbox for unsupervised learning
- Co-organized a neuroscience conference and a hackathon
- Taught a course on unsupervised machine learning at the Organization for Human Brain Mapping Annual Meeting
- Assisted with development/maintenance of IRB documents

PhD Candidate

University of Geneva

2012 – 2016 Geneva, Switzerland

- Led several research projects to predict early diagnosis of Alzheimer's disease using machine learning and neuroimaging data
- Collected clinical and MRI data in >100 elderly individuals at risk for Alzheimer's disease
- Facilitated collaborations between engineers, neurologists, neuropsychologists and cognitive neuroscientists

CERTIFICATIONS

Deep Learning Specialization (Coursera)

EDUCATION

Ph.D. in Neuroscience

University of Geneva

2012 – 2016 Geneva, Switzerland

- Advisors: Prof. Dimitri Van De Ville and Prof. Frédéric Assal
- Thesis: Functional imaging markers of the MCI brain in task and at rest: detecting memory and connectivity impairments in prodromal Alzheimer's disease
- Keywords: neuroimaging, machine learning, prediction, biomarker development

M.Sc. in Clinical Neuroscience

University College London

2009 – 2010 London, United Kingdom

- Advisor: Prof. David J. Werring
- Thesis: Neuroimaging correlates of vascular cognitive impairment: prevalence and functional significance of mesial temporal lobe atrophy
- Keywords: neuroimaging, stroke, cognition, radiological marker

B.Sc. in Psychology

University of Geneva

2006 – 2009 Geneva, Switzerland

SKILLS

Python | Scikit-learn | TensorFlow | PyTorch | R | Bash | MATLAB | GitHub | Unix/Linux

machine learning | deep learning | big data | data processing | data mining | data visualization | scientific software development | MRI | statistics | patient recruitment | patient engagement | scientific writing | literature review | ethics

SELECTED HONORS AND AWARDS

Jeanne Timmins Costello Fellowship from the Montreal Neurological Institute (**40'000 CAD**) for the project *"A multimodal and dimensional approach to study typical and atypical neurodevelopment"* (2022-2023)

Travel awards (total ~6,000 CAD) from the Quebec Bio-Imaging Network, Swiss National Science Foundation, Jean-Falk Vairant Foundation, and Lemanic Neuroscience Doctoral School to attend international conferences (2012-2022)

Finalist for Somerfeld-Ziskind Research Award, recognizing outstanding research investigations in biological psychiatry (2021)

Quebec Autism Research Training Fellowship from the Transforming Autism Care Consortium (**40'000 CAD**) for the project *"Neurodevelopmental subtypes informed by hierarchical brain network features"* (2021)

Project grant from the Boninchi Foundation (**75'000 CHF**) for the project *"A multimodal marker to predict the progression to Alzheimer's disease"* (2016)

Scholarship (**10'000 CHF**) from the Association Suisse des Femmes Diplômées des Universités (2015)

Travel Mobility Grant (**11'600 CHF**) from the Swiss National Science Foundation to visit the Functional Imaging in Neuropsychiatric Disorders Lab, Stanford University, Stanford, CA, USA (2013-2014, 6 months)

SELECTED INVITED TALKS

- Unsupervised machine learning approaches in psychiatric neuroimaging, Organization for Human Brain Mapping Annual Meeting (Singapore 2018, Virtual 2020)
- Identifying transdiagnostic patterns of neural dysfunction, Feindel Brain Imaging Lecture Series, Montreal, Canada (2019)
- Somatosensory-motor dysconnectivity spans multiple transdiagnostic dimensions of psychopathology, Organization for Human Brain Mapping Annual Meeting, Rome, Italy (2019)
- Connectivity-mediated dimensions of psychopathology across mental health and disease, Summer Whistler Scientific Workshop on Brain Functional Organization, Connectivity and Behavior, Noosa, Australia (2019)
- Multivariate and predictive modelling of neural variability in mild cognitive impairment, International Workshop on Pattern Recognition in Neuroimaging, Singapore (2018)
- Predicting pure amnestic mild cognitive impairment conversion to Alzheimer's disease using joint modeling of imaging and clinical data, International Workshop on Pattern Recognition in Neuroimaging, Stanford, CA, USA (2015)
- Structural and functional alterations in presymptomatic Alzheimer's disease revealed by multivariate pattern analysis, Annual Meeting of the Society for Neuroscience, San Diego, CA, USA (2013)
