valkebets valkebets Montreal, Canada

ABOUT

Neuroscientist with expertise in developing neuroimaging-based biomarkers for psychiatric and neurodegenerative diseases

EXPERIENCE

Postdoctoral Research Fellow

McGill University

2021 – Present Montreal, Canada

- Advisor: Prof. Boris C. Bernhardt
- Used **multimodal neuroimaging** data acquired with structural, functional magnetic resonance imaging to identify early predictors of mental illness in a large-scale dataset (N>10,000) with **unsupervised machine learning**
- Produced original scientific articles and reviewed articles for publication
- Applied for, awarded, and managed original research grants
- Supervised and **mentored** students (2 undergraduate students, 1 medical school student)

Postdoctoral Research Fellow

National University of Singapore

2017 – 2020 Singapore

- Advisor: Prof. B.T. Thomas Yeo
- Processed and used neuroimaging data acquired with functional magnetic resonance imaging to identify **shared disease markers** across psychiatric disorders with unsupervised machine learning
- Produced original scientific articles and reviewed articles for publication
- Taught a **course on unsupervised approaches** in psychiatric neuroimaging at the Organization for Human Brain Mapping Annual Meeting (Singapore 2018, Virtual 2020)
- Co-developed a MATLAB-based open source toolbox: myPLS analysis

PhD Candidate

University of Geneva

2012 – 2016 Geneva, Switzerland

- Collected clinical data and brain images acquired with structural and functional magnetic resonance in elderly individuals at risk for Alzheimer's disease
- Processed and used neuroimaging data to predict progression to Alzheimer's disease using supervised machine learning models (e.g., support vector machine, random forest)
- Applied for, awarded, and managed original research grants

EDUCATION

Ph.D. in Neuroscience

University of Geneva

2012 – 2016 Geneva, Switzerland

- Advisors: Prof. Dimitri Van De Ville and Prof. Frédéric Assal
- Thesis: Functional imaging markers of the MCI brain in task and at rest: detecting memory and connectivity impairments in prodromal Alzheimer's disease
- Keywords: neuroimaging, machine learning, prediction, biomarker development

M.Sc. in Clinical Neuroscience

University College London

2009 – 2010 London, United Kingdom

- Advisor: Prof. David J. Werring
- Thesis: Neuroimaging correlates of vascular cognitive impairment: prevalence and functional significance of mesial temporal lobe atrophy
- Keywords: neuroimaging, stroke, cognition, radiological marker

B.Sc. in Psychology

University of Geneva

2006 – 2009 Geneva, Switzerland

SKILLS

MATLAB | R | Python | Jupyter | Bash | Git/Github | Unix/Linux | LaTeX

big data | neuroimaging | MRI | fMRI | scientific research | scientific writing | scientific software development | data visualization | data wrangling | data mining | machine learning

SELECTED HONORS AND AWARDS

2013-2020 - Invited speaker at international conferences and seminars (SfN Annual Meeting; Organization for Human Brain Mapping Annual Meeting; Whistler Scientific Workshop on Brain Functional Organization, Connectivity and Behavior; International Workshop on Pattern Recognition in Neuroimaging; Feindel Brain Imaging Lecture Series)

2012-2022 - Travel awards from the Quebec Bio-Imaging Network, Swiss National Science Foundation, Jean-Falk Vairant Foundation, and Lemanic Neuroscience Doctoral School to attend international conferences

2022 - Jeanne Timmins Costello Fellowship from the Montreal Neurological Institute (**40'000 CAD**) for the project *"A multi-modal and dimensional approach to study typical and atypical neurodevelopment"*

2021 - Finalist for Somerfeld-Ziskind Research Award, which recognizes outstanding research investigations in biological psychiatry

2021 - Quebec Autism Research Training Fellowship from the Transforming Autism Care Consortium (**40'000 CAD**) for the project *"Neurodevelopmental subtypes informed by hierarchical brain network features"*

2016 - Project grant from the Boninchi Foundation (**75'000 CHF**) for the project *"A multimodal marker to predict the progression to Alzheimer's disease"*

2015 - Scholarship (**10'000 CHF**) from the Association Suisse des Femmes Diplômées des Universités

2013 - Travel Mobility Grant (**11'600 CHF**) from the Swiss National Science Foundation to visit the Functional Imaging in Neuropsychiatric Disorders Lab, Stanford University, Stanford, CA, USA (6 months)
